

Description: These activities have been performed after an outreach session when there is remaining time. Usually they don't require more than 5' to finish.

Log: This log does **NOT** include the dates of the performance of each activity. Given the dynamics of each group, I have selected to perform one (or more) of the following.

Name of Activity	Description	Example
Number Assignment	Students are assigned to a number and need to remember it. Student with number 1 starts and calls another number in a random order. The student with the number called needs to call another number, and so on. If they delay replying or if they forget their number, they are out. If somebody forgets the numbers that are out, they are also excluded	
Countdown	Students have to count from 1 to 20. There is only one golden rule: there is no particular order among the students. Students have to yell the consecutive number whenever they want. BUT, whenever 2 students yell the number at the same time, the game is over. All students need to start counting from the beginning.	
Paper Holding	<ol style="list-style-type: none"> 1. Split into teams of three to five people. 2. By way of demonstration, ask two people from a team to volunteer and hold one sheet of paper between the palms of one of their hands. 3. Each team is challenged to assist two of their group members to hold as many pieces of paper off the ground by using only their bodies. 4. To guide fair play, announce that: <ul style="list-style-type: none"> – Only one sheet of paper can be affixed between any two body parts; – No adhesives can be used to hold paper to one's body; – Folding the paper is not permitted; – Each sheet of paper must be in contact with both team members; and – No two sheets of paper can be touching. 5. Distribute sheets of paper to each team, and announce "GO." 6. Allow up to 10 minutes and survey the results 	Youtube
